

Business Content Package

The samples provided below give you a taste of the The Emily Post Institute Professional Development Content Package - containing more than 50 articles. Some articles are in a question and answer format; others are presented as actionable bullet points or top tips; others are in essay form with relevant links to related web content. We have broken the content package into three areas of interest:

- Life at Work
- Professional Communication
- Professional Image

Through an annual license fee, you can employ the content in the most effective way for your organization:

- In your employee newsletter
- Placed on your intranet
- As a resource for Human Resource professionals
